

Program : 5

Aim : Create a HTML page to display a new image and text when the mouse comes over the exiting content in the page using Java script event handling.

Code : Java Script

```
<html>
<body bgcolor="wheat">
<center>
<h1 id="txt">cev</h1>

<script>
function myfunction1(){
document.getElementById("img1").src="clg.jpg";
document.getElementById("txt").innerHTML="college";
}
function myfunction2(){
document.getElementById("img1").src="cev.jpg";
document.getElementById("txt").innerHTML="cev";
}
</script>
</center>
</body>
</html>
```

Output :
