

Program : 4

Aim : Evaluating java script event handling for every click of a button to change the background color of a html page.

Code : Java Script

```
<html>

<head>

<link rel="stylesheet" href="switchcolor.css">

</head>

<body>

<center>

<h2>Changing background colour</h2>

<button>change color</button>

<script>

    var color=["green","grey","plum","gold"]

    var i=0;

    document.querySelector("button").addEventListener("click",

    function(){

        i=i<color.length ? ++i : 0;

        document.querySelector("body").style.background = color[i]

    })

</script>

</center>

</body>

</html>
```

Output :
